

HULL IDENTIFICATION NUMBERS

Boats built after 1973 are required to have a Hull Identification Number (HIN). The number is located at the stern or transom in the upper right corner.

In order to properly register your boat the HIN must be included on the application for Certificate of Number.

If your boat does not have a HIN you must first fill out a Hull Identification Number Request form. A Wildlife Officer will then contact you about applying the number to your boat.

After completing the form you can mail it to:

TWRA Boating Division
P.O. Box 40747
Nashville, TN 37402

FAX it to: 615-781-6649
